The Wadesboro Manufacturing Com-  
pany, the corporate name of the con-  
cern that owns and operates the  
Wadesboro silk mill, of which Mr.  
George Singleton, of New Jersey, is  
the lessee, has perfected arrangements  
for the erection of another large mill  
here. The mill will be located just  
outside of town on the right hand side  
of the Salisbury road, and will be  
operated exclusively with colored  
labor.

Mr. W. T. Brasington has the con-  
tract for the erection of a large frame  
building, in which silk spinning ma-  
chinery will be installed for the pur-  
pose of instructing colored boys and  
girls in its use, to the end that they may  
become efficient operatives by the time  
the mill proper is finished. The perma-  
nent mill will be built of brick and will  
be 200 feet long by 45 feet broad. The  
frame building is to be erected at  
once, and it is hoped to have the en-  
tire plant in operation by the first of  
January next.

The location of the mill is an ideal  
one when it is considered that only  
colored help is to be employed, as that  
section of the town is inhabited exclu-  
sively by colored people. The mill,  
while it will belong to the same par-  
ties who own the present mill here,  
will be operated on an entirely inde-  
pendent basis, and the help in the two  
mills will not in any way come in con-  
tact with each other.

The only silk mill in this country  
that has been successfully operated  
with colored labor is located at  
Fayetteville, this State. This mill has  
been in operation several years, and  
it has been demonstrated that colored  
boys and girls, under proper restric-  
tions, can be developed into fairly good  
operatives. Mr. Robert Singleton,  
superintendent of the mill here, has  
made a study of the management of  
the Fayetteville mill, and it is his pur-  
pose to conduct the mill here along the  
lines that have made that mill a suc-  
cess.

The mill, when completed, will give  
employment to from 150 to 200 opera-  
tives.
